Behavioural Insider Risk Indicators

Tuesday, 2 June 2026
 9.00 AM - 4.00 PM
 Deloitte Ottawa, 16th floor, 100 Queen Street

Morning Session - Foundations and Investigation Frameworks
What Participants Will Gain

- A structured framework for conducting insider risk investigations from initiation to resolution
- Practical insight into how DFIR methodologies support insider threat detection and response
- Enhanced ability to identify indicators of insider risk and translate them into investigative actions
- Peer-driven perspectives on real-world challenges and lessons learned across sectors

Afternoon Session - Psycholinguistic as an Indicator of Threat
What Participants Will Gain

- How to utilize concepts like psycholinguistics to enhance Insider Risk Investigations
- Demonstration of Cognition software that can help to surface indicators of concern.
- Demonstration of Insider Risk capabilities that enhance Insider Risk investigations
- Case studies/real-world stories and outcomes

OUR FACILITATORS

Daniel Bertrand
CInRM CoE, Associate
Instructor

Mr. Bertrand retired from public service with over 35 years of experience in law enforcement and federal investigations, including service as an Officer of the Royal Canadian Mounted Police (RCMP).

With a background in computer forensics, Mr. Bertrand continues to expand his expertise, now focusing on the integration of artificial intelligence applications into intelligence and security practices.

Denis Desnoyers
CInRM CoE, Associate
Instructor

Denis is an Associate Instructor and retired Superintendent with over 35 years of experience in the Royal Canadian Mounted Police (RCMP).

In Denis' career with the RCMP he held the following notable positions, including:
• Officer in Charge of Sensitive and International Investigations, Contingent Commander, Haiti, Senior Investigator Elections Canada, Officer in Charge Ottawa Detachment, and Officer in Charge Integrated Market Enforcement Operations.

Dr. Eric Shaw
Insider Risk Group,
Founder and CEO

Eric Shaw is a clinical psychologist and former intelligence officer who works as a consulting psychologist at U.S. federal and corporate insider risk programs.

He is the creator of the Critical Pathway for Insider Risk (CPIR) and was awarded 12 patents for psycholinguistic software to detect and profile insider threat problems from user communications.

He is the author of the 2023 book, *Psychology of Insider Risk-Detection, Investigation, Case Management*.

Shibu Thomas
Everfox, Field CTO, Global
Insider Risk Solutions

Shibu Thomas is the Field CTO for Global Insider Risk Solutions at Everfox, with over 26 years of experience in IT and cybersecurity. He has spent the past 19+ years specializing in Insider Risk, with expertise in UAM, UEBA, and user-focused risk analysis.

He has worked with U.S. and International government and global private sector organizations to design and mature Insider Risk programs, with a focus on practical implementation and measurable outcomes.

Clay Drye
Principal Solutions
Engineer

Clay is a Principal Solutions Engineer who has 20 years of operational US Intelligence Community and Federal Insider Risk and Cybersecurity experience with a passion for protecting information and people.

His experience runs the gamut of engaging senior leadership, fielding and maintaining technical solutions, creating policies and procedures, training and overseeing teams of engineers and analysts, conducting investigations, and collaborating with partners across the US Government and the Intelligence Community.
